The leading distinction between the senses of *receive* in Eng. is that between the more active senses included in branches I and II, and the almost passive ones placed under III. This distinction, however, is not always perfectly clear in actual use, and it is often difficult or impossible to determine which aspect of the word is meant to be prominent in particular instances. Owing to the very extensive use of the vb. from the 14th c. onwards, there is also much overlapping of its various applications, and in many examples it is uncertain whether a specific or merely general sense is intended.

Teut.: OE. *reccan* (*? récan*) = OS. *rôkjan* (MDu. *roeken*), OHG. *ruoh*(*h*)*en* (MHG. *ruochen*), ON. *rǫ́kja* (mod. Norw. dial. *røkja*) :—OTeut. **rōkjan*, the base of which does not appear in the cognate languages.

The reason of the double consonant in OE. *reccan* (for the normal *récan*) is not clear; it may have been due to association with *reccan* Recche. In ME. there is considerable variation of form, arising from differences both in vowel and consonant; the typical forms with short vowel are *recche* or *retche, recke* and *rack*, contrasted with *rēche* or *rēke*, later *reak*. The latter is common in the 16th c., but from about 1600 the usual literary form has been *reck*.

The OE. pa. t. *róhte* gives the usual ME. pret. forms *roȝt*(*e, roght*(*e*, etc.; the occasional *raught* may be due to the influence of the pa. t. of Reach. The new formations in *-ed*, as *recched, recked*, are app. not older than the 15th c.]

From its earliest appearance in Eng., *reck* is almost exclusively employed in negative or interrogative clauses. In the former the simple negative may be replaced by *nought, nothing, little, not much*, etc.; in the latter the pron. *what* is most usual. There are comparatively few examples of the word during the 17th and 18th c., but in the 19th it again becomes common in rhetorical and poetic language.

1. A certain magistrate or judge having criminal and civil jurisdiction in a city or borough.

The Recorder was originally a person with legal knowledge appointed by the mayor and aldermen to 'record' or keep in mind the proceedings of their courts and the customs of the city, his oral statement of these being taken as the highest evidence of fact. (See Riley *Munimenta Gildhallæ* I. 42–3.) The recorder of London, to whom most of the early evidence refers, is still appointed by the court of aldermen; in other cities and boroughs the appointment is made by the crown, the duties of the office being regulated by the Municipal Corporations Act of 5 and 6 William IV and subsequent enactments. The court of Quarter-Sessions is held by the recorder on dates fixed by himself.

At the present time, under the Scottish Universities Acts of 1858 and 1889, the rector (frequently styled *Lord Rector*) is elected by the matriculated students for a period of three years, and is president of the University Court. It is the practice for him to deliver a 'rectorial address' to the students at some time during his tenure of the office. -red, *suffix*, representing OE. *ræden* condition, which was freely used as a second element in combs. In ME. the full form *-rǣden*, *-rēden*, *-rāden* was by the general dropping of final *-n* reduced to *-rēde*, and this was subsequently shortened to *-red*. (In some cases the *-ēde* was confused with the synonymous *-hēde*.) In Sc., by an early metathesis of *n*, the suffix assumed the form *-rend* (*-rand*), later *-rent* (*-rant*).

Of the numerous words thus formed in OE. (see Bosw.-Toller, s. v.) only a few were retained in ME., as *brother-*, *fer-*, *folk-*, *frend-*, *love-*, *man-*, *sibrede*(*n*, *-red*), repr. OE. *bróðor-*, *gefér-*, *folc-*, *frēond-*, *luf-*, *man*(*n*)*-*, *sibrǣden*. In addition to these, ME. had a few forms not recorded in OE., as *felawrede*, *nezeburrede*, and the surviving representatives of the class, GOSSIPRED, HATRED and KINDRED. (*Cousinred*, used by Scott, is a hybrid and app. an individual formation.)

(VOLUME VIII. Q—S.)

REE—RIBALDOUSLY.

BY

W. A. CRAIGIE, M.A., LL.D.

PREFATORY NOTES.

Ree—Reign. This section contains 820 Main words, 70 Combinations explained under these, and 421 Subordinate entries, or 1311 in all. The obvious combinations recorded and illustrated by quotations amount to 185, making a total of 1496. Of the Main words, 244 are marked † as obsolete, and 13 are distinguished by ‖ as alien or not fully naturalized.

The following figures show the result of comparison with Johnson's and some more recent Dictionaries:—

	Johnson.	Cassell's 'Encyclopædic'.	'Century' Dict.	Funk's 'Standard'.	Here.
Words recorded, *Ree* to *Reign*	172	619	652	547	1496
Words illustrated by quotations	146	319	321	58	1312
Number of illustrative quotations	412	440	844	79	7848

The number of quotations in the corresponding portion of Richardson is 531.

In the present section, as in the preceding, the native words are largely outnumbered by those of Latin and French origin. A few, however, are of some importance or interest, as REED *sb.*[1], REEK *sb.* and *v.*, REEST (of a plough), REEVE *sb.*[1], and REIF. A native origin is also probable for the widespread verb REE (to sift), REEL *sb.* and *v.*, and REEVE *sb.*[2] The cognate languages have contributed very little, but REEF in both senses is ultimately of Scandinavian origin.

In the numerous adoptions from Latin or Romance, and formations based on these, those having the prefix *re-* still hold the foremost place, and include a large number of words in constant use, as *refer*, *refine*, *reflect*, *reform*, *refrain*, *refresh*, *refuge*, *refuse*, *regard*, *regret*, *rehearse*, &c. Many of these have a great variety of obsolete as well as current senses, and some words of this class formerly common are now either rare or have quite disappeared: a notable instance of this is *refel*. Among those to which some historical, legal, or general interest is attached, special mention may be made of *referee*, *reformado*, *reformation*, *refugee*, *regard* (sense 3), *register*, *registrar*, and *regrater*. Of Latin words which are not compounds of *re-* the most noteworthy are *regal* and its derivatives, *regent*, *regiment*, *region*, and *regular*.

There are comparatively few important words in the section which have remoter sources than the above, or of which the etymology is altogether obscure.

Reign—Reserve. This section contains 1682 Main words, 25 Combinations explained under these, and 972 Subordinate entries of obsolete or variant forms, etc., making 2679 in all. The obvious combinations, recorded and

illustrated by quotations, number 139, giving a total of 2818. Of the Main words, 579 are marked † as obsolete, and 25 are marked ‖ as alien or not fully naturalized.

Comparison with Dr. Johnson's and some more recent Dictionaries gives the following figures:—

	Johnson.	Cassell's 'Encyclopædic'.	'Century' Dict.	Funk's 'Standard'.	Here.
Words recorded, *Reign* to *Reserve*	358	1165	1196	1164	2818
Words illustrated by quotations	301	660	662	175	2303
Number of illustrative quotations	978	1034	1930	219	15934

The number of quotations in the corresponding portion of Richardson is 1139.

The number of native words in this part of R is extremely small, the only ones in common use at the present day being the verb REND with its derivative noun RENT, and RENNET *sb.*[1] The few others which occur are now obsolete or confined to dialect use, as *rekels*, *reken*, *reme*, *rerd(e*, *rese*. Adoptions from the other Teutonic languages are also rare, the most interesting being REINDEER.

Of Romanic words which are not formed by means of the prefix RE- the most prominent are REIN *sb.*[1], REINS, RENABLE, RENNET *sb.*[2] and REPUBLIC. Some historical interest attaches to RERE-SUPPER and REREDOS; the latter, as the evidence shows, was practically obsolete, and has only been revived since about 1850.

With the exception of these words, and a very few of more remote origin (as REIS[1], REIS[2], and RESALGAR), the section consists entirely of compounds of RE-, though in some cases, as RENDER and RENT *sb.*[1], the presence of the prefix is not obvious in the form of the word. As a rule the etymology of these words presents no difficulty, but in a few instances (as *rejoin*, *remene*, *repine*) the precise import of the formation is not clear. In many cases the history of the senses is of considerable interest, and the number of obsolete uses, especially in the 16th and 17th centuries, is sometimes very remarkable; *resent* and *resentment* are striking examples of this feature. Among those words which for various reasons deserve special notice may be mentioned *relation*, *relative*, *relay*, *reliable*, *relic*, *relief*, *religion*, *relish*, *rely*, *remonstrance*, *remord* (obs.), *renaissance*, *renegue*, *replevin*, *reprieve*, *request*, *rescue*. In most of these, and in many other cases, new light has been thrown on the history of the word by the copious materials collected for this dictionary.

Reserve—Ribaldously. This section contains 1601 Main words, 56 Combinations explained under these, and 880 Subordinate entries of obsolete or variant forms, etc., making 2537 in all. The obvious combinations recorded and illustrated by quotations number 226, and bring up the total number of entries to 2763. Of the Main words 413 are marked † as obsolete, and 72 are marked ‖ as alien or not completely naturalized.

Comparison with Johnson's and some recent Dictionaries gives the following figures:—

	Johnson.	Cassell's 'Encyclopædic'.	'Century' Dict.	Funk's 'Standard'.	Here.
Words recorded, *Reserve* to *Ribaldously*	317	1412	1658	1509	2763
Words illustrated by quotations	260	550	612	171	2385
Number of quotations	948	911	1835	226	15983

The number of quotations in the corresponding portion of Richardson is 947.

In this section the native English element is no more extensive than in the two preceding ones, the only words of importance which belong to it being REST *sb.*[1] and *v.*[1] (with some derivatives such as RESTFUL *a.*, RESTLESS *a.*), RETCH *v.*[2], and RIB *sb.*[1] and *v.*[1] Along with these may be mentioned the obs. or dial. RETCH *v.*[1], RETHE *a.*, REW *sb.*[1], and the local RHINE[1]. The technical terms RET *v.*[2], RIB *sb.*[3] and *v.*[2], were probably adopted from one of the cognate languages.

Of the Latin or Romance words which form the bulk of the section, the great majority are compounds of RE-, and many of these have a long and interesting history in English. As usual, a large number of them were adopted from older French, such as *reset*, *respite*, *restore*, *restrain*, *retail*, *retinue*, *retire*, *retour*, *retreat*, *retrieve*, *return*, *reward*, etc. Later adoptions from French are REVEILLE, REVERSI, REVÊTE(MENT. In a few cases the presence of the prefix is not apparent at first sight, as in REST *sb.*[2] and *v.*[2], REST *sb.*[3] and *v.*[3], RESTIFF or RESTIVE *a.*, RET *v.*[1], REVEL *sb.*[1] and *v.*[1]

Another group of Latin formations is made up of words with the prefix *retro-*, of which the earliest to appear in English is RETROGRADE. Latin is also the ultimate source of RESIN, and has directly contributed RETE, RETIARIUS, RETICULUM, RETINA, RETINACULUM; Anglicized derivatives from L. *rēte* appear in *retiary*, *reticle*, *reticular*, *reticulation*, etc. Of French words not formed with *re-* the most important are REYNARD, RIAL, RIANT, and RIBALD.

The words beginning with RH- (which have been separately prepared by Mr. C. T. Onions, M.A.) are for the most part ultimately of Greek origin; among the exceptions to this are RHATANY, RHEIM, RHEMISH, RHENISH, RHINE, RHINO, and (partly) RHUBARB. Those which were adopted in Middle English appear at first with *r-* only (as *rethor* RHETOR, *reume* RHEUM[1]), the restoration of *rh-* being a result of the classical influence prevalent in the 16th cent. One of the most interesting examples of this is the change of the older *rime*, *ryme* to RHYTHM and RHYME.

8. A part of various musical instruments.

a. In the oboe and bassoon: A part of the mouth-piece, consisting of two slightly concave wedge-shaped pieces of reed or cane fixed face to face on the end of a metal tube, and producing a musical sound by vibration when the instrument is blown into. Also, a similar device fixed in the chanter of a bagpipe. (Now freq. called a *double reed* in distinction to c.)

b. (*a*) In the organ: A small metal tube fixed at the lower end of a pipe, having a longitudinal opening covered or closed by a metal tongue, which is made to vibrate by the air entering the tube. *Free reed* (see quot. 1855 and cf. note to c). (*b*) In a bagpipe drone: A piece of hollow reed, closed at one end by a joint, and having a tongue made on one side by splitting from a cross-cut near the joint backwards in the direction of the open end.

1727–41 Chambers *Cycl.* s.v. *Organ*, A reed-pipe consists of a foot.., which carries the wind into the shallot, or reed.., which is a hollow demi-cylinder [etc.]. 1855 Hopkins *Organ* xviii. 93 The reed is a small cylindrical tube of brass. .. In the front of the reed, an opening is left, running lengthways, presenting an appearance as though a portion of the reed had been cut away, at which the wind enters. *Ibid.* 95 A third kind of reed is used on the continent, called the free-reed. In this variety..the tongue,..instead of striking on the edges of the reed, is impelled into the opening by the wind. 1879 W. H. Stone in Grove *Dict. Mus.* I. 123/2 The drone reeds..somewhat resemble the reed in organ pipes, the loose flap of cane replacing the tongue, the uncut part the tube or reed proper.

c. (*a*) A metal tongue used to produce sound by vibration, *esp.* that used in an organ-pipe; (*b*) a slip of cane used for the same purpose, as in the clarinet. (Sometimes called *single reed*, in distinction to a.)

Beating or *striking reed*, one which strikes against its seat; in the organ, against the edges of the opening in the tube. *Free reed*, one which produces sound by vibration only, esp. one which vibrates in the opening of a tube without touching the edges, as in instruments of the reed-organ type.

1. A rotatory instrument on which thread is wound after it is spun, or silk as it is drawn from the cocoons, and from which it may again be easily wound off upon bobbins or spools.

The reel now commonly used is an open framework, consisting of a horizontal axis with radiating arms at each end, which carry bars extending parallel to the axis, so that the whole has a cylindrical form. The circumference of the reel is in some cases made of such dimensions that in a given number of revolutions it takes up a certain length of thread, forming a skein or hank. The older reels used in connexion with the spindle or spinning-wheel were of simpler forms (cf. quot. 1727–41).
